No Seed House In America Like "Glick's"

A Few Reasons Why We Sell "Better Goods" for "Less Money"

NO OTHER SEED HOUSE IN AMERICA CONDUCTS ITS BUSINESS AS WE DO

Our place of business is located on one of our farms. This gives us many advantages, besides saving enormous city expenses, we have the advantage of being on the farm and can look after every detail of the work, and see that EVERYTHING IS DONE RIGHT.

Growing good seeds and plants is no trust to luck work. It matters not how much experienced help is employed, it requires constant and personal attention. The advantages just mentioned are THE FOUNDATION OF SUCCESS FOR GLICK'S SEEDS AND PLANTS.

The results our seeds and plants have been giving BRINGS SUCCESS INTO THE HOMES OF OUR PATRONS. The repeated orders and the many kind letters and words of encouragement we receive from our patrons throughout the season prove what we say.

We have erected another greenhouse, and have purchased another farm, and are making a desperate effort to keep in line with our rapidly increasing business. OUR CONSTANT AIM IS TO PRODUCE THE BEST that can be grown, and keep the PRICES AS LOW as it is possible to GROW PEDIGREE STOCK, and we assure our patrons of square and honorable treatment in any and all dealings they may have with us.

Thanking our patrons for their many past favors, and wishing you the best of success, and hoping to hear from you often, we remain,

Very truly yours,

GLICK'S SEED FARMS.

SEEDS POSTPAID BY MAIL

Prices quoted in this catalogue include payment of postage on all seeds ordered by the packet, ounce, quarter pound, pound or pint.

If ordered sent by express, or freight, deduct 10 cents per pound from mail prices quoted.

Larger quantities than pounds or pints will be sent by express or freight at purchaser's expense.

It sometimes happens that we run short of some varieties of seeds or plants, in such cases we substitute. If you do not like us to do this, kindly mark your order, "Don't Substitute."

All seeds and plants are selected with the best of care, but we give no warranty, either expressed or implied, nor will we be responsible for the crop.

Send Us Your Orders; We will Send You Good Goods.

GRASS SEED

Make Two Blades of Grass Grow Where Only One Grew Before

If you are interested in doubling your hay crop, read this carefully; it will interest you. To do this, requires pure high-grade seed of strong germinating power. Most farmers are aware of this, but in buying their seed from the village merchant, or from some dealer, the result is seldom very satisfactory. Most merchants or dealers buy their seed from wholesale houses at a distance, and frequently they get old or adulterated seed. Of course, the merchant is not to blame, he may be as honest as the day is long, but the seed business is a side issue with most merchants; their time and attention may be devoted to some article that they sell daily, and in buying their seed they do not think of the great importance of good fresh seed, and may never even think of inquiring whether it is new seed they are getting; whether it is imported seed, or where it was grown; these are matters of great importance. For the past few years large quantities of inferior seed have been imported from Europe, owing to their being cheaper in price. Many of the city houses have been handling it as A No. 1 seed, when in many cases it contained Dodder, or other foul seeds. This imported seed has found its way into almost every state in the union, and is frequently sold to county stores as American seed. In some instances large quantities of trefoil seed have been imported for the purpose of adulterating Clover seed, which it closely resembles in appearance.

According to Bulletin (H. R. 13835) issued by the U. S. Government at Washington, 93169 lbs. of trefoil were imported in twelve months, (trefoil seed is of no other use). Clover seed has been found, by the government, to contain 50 per cent., (one-half), trefoil. At the present price of Clover seed, this nets the adulterator several dollars clear gain on every bushel adulterated. Up-to-date farmers are getting aware of the fact, but still, many a bushel of such seed finds its way into the hands of the farmer.

As You Sow, so Shall You Reap.

Before buying your seed get our samples; don't look to a few cents in the first cost of seed. No one can offer seed of equal quality for less money. We get our best grades direct from the growers, and personally inspect it on the field, and are in a position to fill your order with good seed.

Prices are subject to market changes, ask for firm quotations.

Fancy Kentucky Blue This is pre-eminently a pasture grass, forming a close fine sward. It thrives best in dry well-drained or lime-stone soils. 14 lbs. to the bu.; 2½ bus. to the acre. **Per lb. 35 cts.**, postpaid; **per bushel of 14 lbs. \$2.25.**

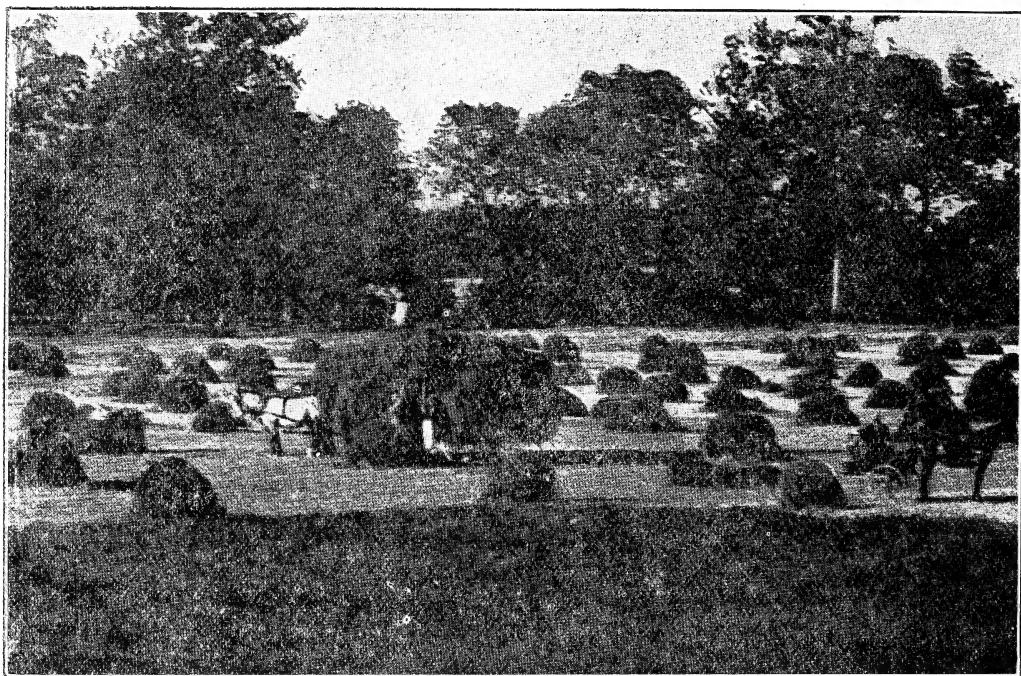

Meadow Fresco An excellent pasture grass; the tender blades being relished by cattle. About 22 lbs. to the bushel; 2 bus. to the acre. **Per lb. 35 cts.**, postpaid; **bushel of 22 lbs. \$2.50.**

Hard Fresco An excellent pasture or lawn grass, does well in dry or shady locations. About 12 lbs. to the bushel; 2½ bus. to the acre. **Per lb. 35 cts.**, postpaid; **per bu. of 12 lbs. \$2.35.**

Orchard Grass This is one of the most desirable of pasture grasses for stock and also for producing large crops of hay. It succeeds well in quite shady places, hence the name of *Orchard Grass*. Choicest re-cleaned seed, 14 lbs. to the bushel; 3 bus. to the acre. **Per lb. 40c.**, postpaid; **bu. of 14 lbs. \$2.75.**

Red Top or Herd Grass. It is a most valuable addition to sow with timothy and clover to form a close sward for pasturage. About 32 lbs. to the bushel; 1 bu. to the acre; for lawn, 3 bus. to the acre. **Per lb. 35c.**, postpaid; **per bushel of 32 lbs. \$5.50.**

Lawn Grass **Per pound 30c.**, postpaid; **10 lbs. \$2.00.**
by express.

FIRST CUTTING OF OUR SUNNYBROOK HAY MIXTURE

SUNNYBROOK HAY MIXTURE

This mixture is the success of years of experience and careful study, and is made up with the object of almost doubling the hay crop. The great results this mixture has been giving everywhere, make us confident in offering it to our patrons as **The Best Hay and Pasture Mixture Ever Introduced.**

Few farmers seem to realize the importance of proper seeding to grass. The majority sow scarcely anything more than the ordinary clover and timothy seed. This, in fact, is what we most depend on for the bulk of our hay crop, but by sowing the proper grasses in connection with them the hay crop can be almost doubled, and in such instances where the clover or timothy should be a failure, these should be sufficient to produce a good crop of hay.

Besides increasing the hay crop, it is very valuable for pasture, after the hay crop has been cut. It grows up quickly, forming a close green sward, very desirable for pasturing cattle and horses.

This mixture contains all the Clover and Timothy seed that is required. It is indeed a perfect mixture, intended for spring sowing on fields that have been seeded to wheat or rye, the fall previous, or it may be sown with oats or spring rye; the latter should not be sown very thick. Sow 16 pounds per acre. 16 lb. bag \$2.00, bushel (48 lbs.) \$7.75, 2½ bu. \$18.50. Bags free.

TIMOTHY SEED

“GOLD MEDAL” BRAND, Highest Quality. Our “Gold Medal” Brand is **The Best That Money Can Buy.** We believe there is no seed sold anywhere for less money, equal to our High Quality, “Gold Medal” Brand.

Pound, postpaid, 25 cts., bushel (45 lbs.) \$2.50. Bags 22 cts. each.

CHOICE BRAND, Extra Quality. Our Choice Brand is as good seed and far superior in quality to most of the seed now offered by many dealers

as the best seed. Dealers, who have been handling Choice Brand as their best seed, will find this seed to give them excellent satisfaction. However, we believe it would pay all dealers to handle our "Gold Medal" Brand, and establish a reputation for their seed. The farmer will appreciate the best seed, and seldom objects to the difference in price, when he knows he is getting quality for it. Bushel (45 lbs.) \$2.25. Bags 22 cts. each.

The Above Photograph Shows the Great Vitality and Vigorous Growth for which Our Clovers are Noted.

MEDIUM RED CLOVER SEED, (Crop Short)

FARMERS' "FANCY BRAND," Highest Quality.

This is seed of our own selection, and we are offering it as having no equal for Purity and High Germinating Power. We again caution our patrons to place their order promptly; the supply of seed is limited. Don't let the prices induce you to buy anything but the Farmers' "Fancy Brand."

Pound, postpaid, 35 cts., bushel (60 lbs.) \$9.75. Bags 22 cts. each.

DEALERS' CHOICE "STAR BRAND"

Our Choice Brand has been giving excellent satisfaction to both the dealers and the farmer. Dealers praise it everywhere. The average buyer cannot tell it from our Farmers' "Fancy Brand."

Bushel (60 lbs.) \$9.50. Bags 22 cts. each.

"PRIME BRAND"

Our Prime Brand is as good as anyone has it, but we do not advise the farmer to buy it. Dealers, who look only to the price, can make nice money on it. Bushel (60 lbs.) \$9.25. Bags 22 cts. each.

Prices and Grades of the MAMMOTH RED CLOVER are the same as on the Medium. When ordering always mention what is wanted. The Mammoth is about two weeks later than the Medium, and is a very strong and robust grower.

WHITE CLOVER, (Small)

Pound, postpaid, 40 cts., bushel (60 lbs.) \$14.00. Bags 22 cts. each.

ALSIKE CLOVER

The Alsike Clover is similar to the Red Clover, but is finer and hardier; the flowers are of a lightish pink. Many farmers mix and sow it with the Red Clover. **Choice brand, Bushel (60 lbs.) \$9.25.** Bags 22 cts each.

Fancy Brand, bushel (60 lbs.) \$9.50. Bags 22 cts each.

CRIMSON CLOVER

(Prices on application.)

ALFALFA CLOVER

Lb. 40 cts., postpaid; bu. \$11.50.

PERMANENT PASTURE MIXTURE

"One thing is certain, that good pasture land is the foundation of the riches of a farm."—SINCLAIR.

The most important features of successful farming (especially on the dairy or stock farm) are good hay crops and abundant pasturage. These are more readily and surely obtained by *a proper combination of the most suitable grasses* than by the old plan of seeding with Timothy alone or in mixture with common Red Clover, which generally dies out after the first summer. This **Permanent Pasture Mixture** yields a very heavy crop of the finest and most succulent hay early in the season, together with a heavy crop of aftermath or abundant pasturage. We have planted this mixture extensively on our own fields for several years with the most gratifying results, both when sown on dry sandy hillsides and on moist meadow lands.

We recommend using two bushels, or 50 lbs, of this mixture per acre, and it can be sown with grain or alone on well-prepared land either in the early fall or early spring. It is also an advantage to sow at the same time, or in the spring, when fall seeded, 10 or 15 lbs. per acre of **Alsike Clover**, as this variety if much the best for mixed hay and at the same time is hardier and will endure longer in the close thick sod of grass than any other.

Per bushel \$5.00, 2 bushel \$9.00. Bags 22 cts. each.

BOUNTIFUL EIGHTY DAY CORN

This is the third year since the introduction of this **Grand New Corn**. We have never had it to ripen in eighty days, but we have had it to produce an immense crop, under favorable conditions, when planted the last day of June, which is six weeks later than our usual time of planting in this vicinity. It seems to thrive in almost any kind of soil, is somewhat later than the Early Mastoden but more productive. Will not do well in the North.

Owing to its great root development, it is a strong, robust grower, and seems to stand more dry weather than other variety. On good soil **the ears attain an immense size**, having only a medium sized cob. It is a very profitable corn to shell, and a good keeper, always commands highest market price.

Selection of Seed---Our seed is from selected ears, with the small ends taken off before shelling it; the seed we send out is the kind we plant on our own farms. Anyone purchasing seed direct from us, can examine and test it upon arrival, and if it is not as we claim, they can return it to us promptly, and get their money refunded. **Peck 75 cts., bu., shelled, \$1.75, 2 bu. \$3.25, per pound, postpaid, 25 cts.**

WHITE TARTAR KING OATS, (Sunnybrook Strain)

This fine and very productive Oats has been thoroughly tested and yields exceptionally good in this vicinity, and is a great favorite in most of the adjoining states. On our Sunnybrook Farm it made a fine growth with stiff, heavy straw 3 ft. in height. The grains are borne in close, compact branching heads; is free from smut. The grains are very white, short, thick, plump and unusually heavy, and always exceeds the legal weight per measured bu. **Our Sunnybrook Strain has no superior.**

Peck, (8 lbs.), 45 cts., bu. \$1.40, 2 bu. \$2.50, 10 bu. \$12.00. Bags free.

We Are Headquarters for Maine Grown Seed Potatoes

Having made a personal trip through Aroostock County, Maine, early last fall, we are familiar with the best growers, and having purchased several car loads of each of the leading varieties; we were able to buy **Pedigree Stock at reasonable prices.**

In all, we have about thirty different varieties, and our stock is of **The Finest Grown in Aroostock County.** Hundreds of cars loads of fine seed stock rotted in Maine this fall, but we were fortunate in getting a good supply before prices started to advance, and we assure our patrons, if they order promptly, we can give them excellent stock at low prices as long as the present stock lasts.

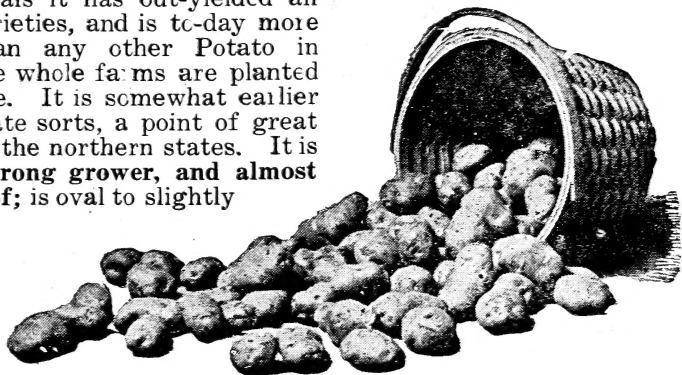

Owing to the severe drought the past summer in our locality, we have only a very limited supply of our own growing to offer.

Purchasers pay the freight, or express charges, on Pecks, Bushels and Barrels. We ship in bbl. sacks containing 11 peck, (165 lbs.), each. All orders will be promptly acknowledged, and the Potatoes shipped as soon as weather permits, (unless otherwise mentioned). Owing to the short crop in Seed Potatoes almost over the whole country, we will likely run short of some varieties toward the end of the season; in such cases we have to substitute. If you do not wish us to do this, mark your order "**Don't Substitute.**"

Space will not allow us to describe all the different varieties. We will simply give a few hints about the newest and most popular varieties, such as the **Early Day-Break, Irish Cobbler** and the **Improved Green Mountain.**

IMPROVED GREEN MOUNTAIN

The Improved Green Mountain has proved to be **The Surest Cropper among the main crop varieties;** especially in the severe drought of the past season. In our trials it has out-yielded all other main crop varieties, and is to-day more largely grown than any other Potato in America. In Maine whole farms are planted to this variety alone. It is somewhat earlier than many of the late sorts, a point of great favor, especially in the northern states. It is an exceptionally strong grower, and almost entirely blight proof; is oval to slightly oblong in shape, has yellow eyes, the skin is pure white, slightly netted, and in quality it is one of the best. It is an excellent keeper and a good shipper. This, together with its fine table qualities, makes it one of the foremost varieties on the large city markets. (50 eyes, postpaid, 30 cts.), Peck 45 cts., bushel \$1.25, barrel \$2.90, 10 barrels \$27.50.

IMPROVED GREEN MOUNTAIN

GLICKS SEED FARM.
LANCASTER, PA.

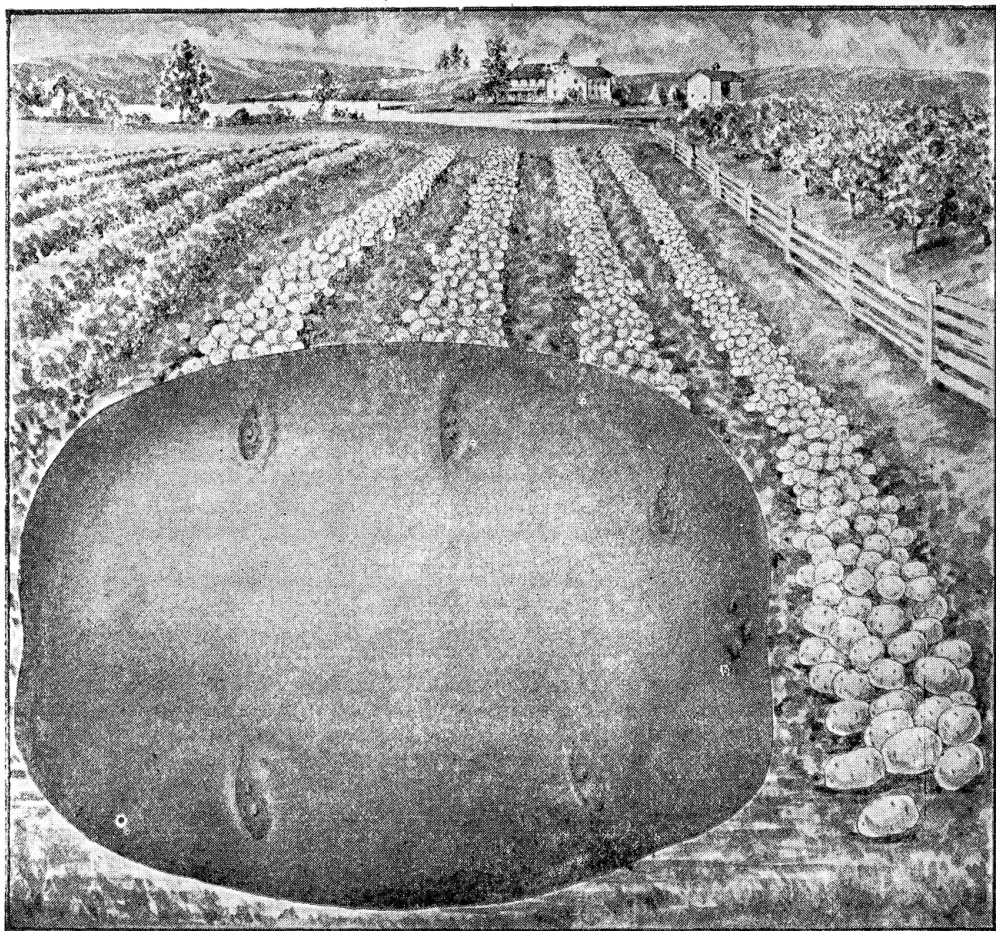

ALLENTOWN, PA.

DEAR SIRS:

The Seed Potatoes purchased from you last spring gave excellent results; we have just finished digging them. If we had purchased all our seed from you, we would be over \$100.00 better off. Yours is the most vigorous seed we ever planted. Nearly all our neighbors noticed them growing; you can look for large sized orders next year. O. W. BANKERT.

GLICK'S EXTRA EARLY DAY-BREAK

POSITIVELY THE EARLIEST WHITE POTATO IN EXISTANCE

Since the introduction of the Early Rose, few Potatoes have created such a sensation among growers, as did this notable Potato the past season. We have shipped it to almost every state east of the Mississippi River, and have not had a single complaint from anyone; on the contrary, **we have many flattering testimonials for it.**

Owing to the great demand for this Potato, we should put an enormous price on it in order to make it reach all through the season. This is however not our method of doing business, on the other hand, we have figured closely and have put the price within the reach of all, and would advise you **to place your order now.**

The Early Day-Break resembles the Irish Cobbler, both in shape and quality, but is **much earlier and wonderfully productive.** It is fully a week earlier than any pure white potato in existence. The skin and flesh is snow white, with sometimes a slight pink cast near the eye. **In quality it stands second to none of the extra early varieties.** No market or home garden should be without it. (50 eyes, postpaid, 35 cts.), peck 60 cts., bu. \$1.50, barrel sack \$3.90, 2 bbls. \$7.50, 10 bbls. \$36.50.

IRISH COBBLER

This variety has rapidly come to the front, and is now being planted very extensively, both north and south. It is only ten days to two weeks later than our Early Day-Break, has few eyes, is oval in shape, smooth white skin, is very productive, and always commands top notch prices. Our stock of this variety is hard to equal. We can furnish either Maine or Pennsylvania grown seed, **Pedigree Stock**, at the same price, but owing to the droughth in this locality, our own growing is not as large in size as the Maine grown seed. Unless otherwise specified, we will ship Maine grown seed. (50 eyes, postpaid, 25 cts.), peck 50 cts., bushel \$1.40, bbl. sack \$3.40, 10 bbls \$32.50.

All prices are subject to change without notice.

In 10 barrel lots deduct 15 cts. per bbl. from above list price.

Our prices are as low as **Good, Pure Pedigree Stock** can be offered by any reliable firm. If you are offered seed for less money, it might be advisable for you to learn something about its quality before you buy it. **The Best is Always the Cheapest.**

We book orders now, at these prices for spring delivery, if 50 cents per barrel is sent cash with the order. The balance to be paid when shipment is to be made. Special prices on car lots; mention variety.

Fertilizers for the Farm

Save Dealer's Profit - Buy Direct

ONE DAY'S SHIPMENT

Nearly all makes of fertilizers give some results, but with fertilizers, like with everything else, the best and properly made are the cheapest, and most economical in the end. Never buy any fertilizer because your nearest dealer, or neighbor Brown sells that particular kind. If possible, learn from what ingredients they are made before you buy them. **It will pay you.**

We use large quantities, and have made fertilizers a study, and can **Save You Money**, or in other words, **We can Guarantee Better Results for the same Money.** This may seem a broad statement, but we are in a position to prove it, whether you buy in car load lot or simply buy a few sacks.

The first and most important, is **The Quality of Our Fertilizers.** They are manufactured from strictly high grade materials. **You Get Full Value** for every dollar invested.

You may have been paying \$35.00 or even \$50.00 per ton for your fertilizers, and you may have had some results, but this does not prove that you have received **Full Value for Your Money.**

Fertilizers are now being manufactured from old leather scrap, kainit, and dozens of other articles that will analyze well with chemists, but to the crops they are worth only about half their estimate value. Such goods will give some results, but never give **Full Value for the Money**, besides, in dry seasons they often do more harm than good. Is this the kind you have been using? Or, do you know how your goods are made.

Get Better Results for the Same Money Don't Buy the Cat in the Bag.

A **PERFECT FERTILIZER** should be so made that the different plant foods are available just when they are needed by the crop. For instance, if the different plant foods are supplied in too available a form, the greater part of it may be lost, or leached out of the soil before the plant can make use of it, and nothing remains to finish the crop. On the other hand, if the plant food is all supplied in a less soluble form, the season may be nearly ended before the crop gets much benefit from it, which is usually equally as disastrous. The proper thing is to use a fertilizer that

Gives the Crops What They Need, "No More"

When They Need It, "Not Before"

All crops have a limited time in which they make their growth, and for the best results, **They Must be Kept at It from Start to Finish.**

All the money invested for fertilizers that are not formulated for the full interests of the farmer, is money wasted. If everyone could be made to realize what sums of money are wasted annually, by such "trust to luck" buying *the cat in the bag*, there would be some wonderful changes made in the fertilizer world. If space would permit, we could fill pages after pages with such fertilizer history, but for the wide awake, a hint is sufficient.

MANUFACTURING FERTILIZERS

Since putting up our own goods, we have

Fertilizers that Bring Results.

They Contain All the Necessary High Grade Plant Foods in such proportions and forms, that gives the required percentage to the crop just when it is needed, thus **Insuring A Quick, Vigorous and Abundant Growth.**
A LARGE YIELD AND FULL VALUE FOR THE MONEY.

OUR EXCELLENT LOCATION, SPLENDID SHIPPING FACILITIES

And Many Other Advantages enable us to offer **Strictly High Grade Up-to-Date Fertilizers** for less than many manufacturers ask for inferior goods in carload lots.

Our Guarantee

We guarantee all our Fertilizers to be in excellent drilling condition, and warrant each and every shipment to be just as we say, or it can be promptly returned to us the day it is received, and we will refund the money paid us for it.

When possible we make all small shipments from the nearest point, thus insuring our patrons low freight rates. **No Order is too Small to Receive Careful Attention, and None too Large** for us to ship promptly; however it is always safest to order as long in advance as possible. We book orders in advance, if \$1.00 per ton is sent Cash With the Order, the balance to be paid when shipment is to be made. (Positively no goods sent cash on delivery.)

To induce to order early, we will mail a copy of **Helpful Hints FREE** to everyone sending in their order at least ten days before shipment is to be made.

HELPFUL HINTS---What It Contains.

Helpful Hints contains valuable information on the following subjects :

FERTILIZERS AND HOW TO USE THEM ON DIFFERENT CROPS.

Composition of various fertilizer materials, and their analysis; including tobacco stems, wood ashes, etc., etc.

How to grow Bumper Potato Crops, either for the early market or main crop.

How to protect Melon and Cucumber Vines, Squash, etc., from the attack of bugs.

Number of plants required per acre at any given distance.

Number of bushels of different varieties of farm seeds required per acre.

Quantity of Garden Seeds required for every hundred feet of row.

The above leaflet will be sent free to anyone ordering fertilizers at least ten days before shipment is to be made, or it will be mailed free with every order for Garden Seeds amounting to \$1.00, or over, if requested when ordering.

Our Fertilizers are put up in strong burlap sacks, of 167 lbs. each. (12 sacks to the ton of 2,000 lbs.)

All prices, for less than car lots, are F. O. B. cars at our warehouses or factory. (In car lots, of 15 tons, or more, we pay the freight.)

Two Beans of Special Merit

Stringless Green-Pod Bush Bean
and
Glick's Rust Proof New Wonder Bush Bean

ASPARAGUS

Barr's Mammoth. The stalks are very large and retain their thickness completely up to the top, are very tender and succulent, and always command the highest market price. **Packet 5 cts.; oz. 10 cts.; lb. 75 cts.**

BEANS

Stringless Green-Pod Bush Bean

This is without a doubt the most popular Green Podded Bean in the world, not only is it the **Earliest and Tenderest of all Bush Beans**, but it remains longer in edible condition than any bean known to us. We consider it so far superior to all other green beans, that we have put all others aside as worthless. **Plant the Stringless Green Pod for Home or Market.** (See price list below.)

Glick's Rust-Proof New Wonder Wax Bush Bean

For years we have been looking for a wax-podded bean that is Stringless and possesses the quality of our Stringless Green-Podded Bean. The New Wonder Wax comes nearer to it than any bean we ever saw. The pods are round, straight and very brittle; it is almost entirely Stringless and very productive. Its good qualities and fine appearance will surely win the admiration of all who see it. *Prices below. One packet of each of these great Beans sent prepaid on receipt of 15 cts.*

The Two Grandest Beets That Grow

WE CAN'T HELP BEING PROUD OF THEM

THEY ARE EVERYBODY'S FAVORITE

GLICK'S EARLY SURE-GO BEET

Glick's Early Sure-Go Beet

"The First on the Market"

For six consecutive years this Beet has carried the honor of being **The Earliest Good Beet in Existence**. Its quick growth and uniform size, together with its fine table qualities, have won for it almost a world wide reputation. **Truckers who plant it, control their market.** **"It's Sure to Go."** Per pkt. 10 cents, oz. 20 cents, quarter pound 50 cts., pound \$1.25.

Glick's New Century Late Beet

This grand main crop Beet is globe shaped, somewhat tapered toward the root; tops a very light green; flesh dark crimson, it is always tender, it possesses a delicious flavor of its own. Many gardeners store hundreds of bushels of this Beet in cellars and pits, and market them through the winter at fancy prices. **Its Quality is always the same.** No garden complete without it. Per pkt. 10 cts., oz. 20 cts., quarter pound 50 cts., pound \$1.50.

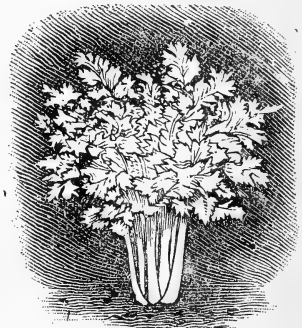

MANGLE, Mammoth Prize Red.

Packet 5 cts., oz. 10 cts., pound 45 cts.

CELERY

Winter Queen

This is one of the most valuable varieties in cultivation, even excelling the celebrated Giant Pascal, as a winter keeper. Its compact, thick stems and its great rich golden heart, gives it a very showy appearance, when bleached for market. It is very solid, crisp and of a delicious nutty flavor.

WINTER QUEEN CELERY

Winter Queen. See above description.

Giant Pascal. Old standard variety. Per pkt. 5 cts.

White Plume. The earliest self-bleaching variety.

Golden Self-Bleaching. (*Vilmorin Strain*)

 We can furnish nice stocky plants of all the above varieties; for prices see page and 22.

We Are Headquarters for CABBAGE Seed and Plants

We Grow Acres of Plants—See Prices on Pages 20 and 21

NO SEED HOUSE CAN OFFER CABBAGE SEED SUPERIOR TO OUR

Selected Early Jersey Wakefield

No early cabbage is better and wider known than our Selected Early Jersey Wakefield. It is the largest hard heading extra early variety in existence, and is very popular everywhere. Southern truckers ship thousands of barrels to the northern markets in early spring.

Packet 10 cts., oz. 30 cts., quarter lb. \$1.00, pound \$3.00.

EARLY JERSEY WAKEFIELD

New Reliable

This variety was introduced by us five years ago, and is yet without an equal. It is only ten days to two weeks later than Wakefield, and almost as large as Flat Dutch, and is always Sure to Head.

For the main crop it is one of the surest headers. In our trials it has proven to be far superior to all other varieties, even excelled the well known Surehead. It being a quick grower, it may be planted two weeks later than most other kinds, yet it yields wonderfully; nearly every plant making a nice solid head. It is the Market Gardeners All-Around Cabbage. GIVE IT A TRIAL. Pkt. 10 cts., oz. 30 cts., quarter lb. \$1.00, pound \$3.00.

Standard Varieties of CABBAGE, Pkt. 5 cts.

You can select six 5 cent packets for 25 cts., or three 10 ct. pkts. for 25 cts.

 We can furnish fine stocky plants of all the above varieties of Cabbage. Prices on pages 20 and 21.

HENDERSON'S EARLY SNOWBALL CAULIFLOWER

Our Snowball Cauliflower is a sure header, forming large heads of snowy whiteness. It is the earliest variety in cultivation, but is equally good for main crop, and may be planted until late in July.

Packet 20 cts., oz. \$2.50, quarter lb. \$6.50.

DANVER HALF LONG CARROT

A great favorite among Carrot growers. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

Three SUGAR CORNS That Are "REALLY SWEET"

KENDEL'S EARLY GIANT,
COUNTRY GENTLEMAN,
STOWELL'S EVERGREEN XX SUGAR
(PEDIGREE STOCK---SEED THAT GROWS.)

Years of experience and the careful study of the culture of Sugar Corn, either for market or home use, has taught us that the best results can be had by planting no more than three varieties, for which we prefer the Kendel's Early Giant, as the **Best Large Eared and Sweetest of all Early Corns.** The Country Gentleman makes an excellent succession, between it and the Stowell's Evergreen XX Sugar, **The Best.**

The first planting should be made as early in the spring as safe, in well enriched soil, and should consist of the three kinds just mentioned; this to be followed every ten days by a planting of the last named variety. To have the finest sweet corn, it must be gathered in just the right condition, (when the skin of the grain breaks at the slightest puncture). It is best if served as soon as gathered. To get the quickest and best results, use 200 lbs. per acre of our Up-to-Date Corn Grower, offered on page 10. Care must be taken not have it come in contact with the seed.

Sweet Corn Prices

	Not Prepaid			
	Qt.	4 qts.	Pk.	Bu.
Early Adams. Very hardy early corn; not sweet.				
Kendel's Early Giant. Earliest large-eared sugar corn				
Crosby's Early. Medium early; good quality.	.20	.60	\$1 00	\$3 90
Country Gentleman. Five days earlier than Evergreen				
Early White Evergreen. A few days earlier than XX.				
Stowell's XX Evergreen. Best main crop variety.

INDIANA, PA.

GENTLEMEN:—I wish to say, everything we purchased from you was highly satisfactory, and we wish you much success.

Prop. Floribel Greenhouses.

LETTUCE

FAVORITE HEAD LETTUCE

This variety is what its name implies, a great favorite among the Lettuce growers. The heads of this remarkable Lettuce are uniformly large, solid and of a buttery yellow appearance, is very crisp, and of excellent flavor. It can be sown in early spring, or it may be sown in the fall and allowed to remain out all winter. It is an excellent variety for forcing. **Pkt. 10 cts., oz. 35 cts.**

5 dozen plants, postpaid, 25 cents.

BLACK SEEDED SIMPSON LETTUCE

The best extra early cutting lettuce. When sown early it grows quickly, is of excellent quality, or if transplanted in beds it will form large, loose heads of fine quality. As an early cutting lettuce it has no equal. Every garden should have a good bed of it. Market gardeners plant it extensively, and it usually brings good prices. **Pkt. 5 cts., oz. 15 cts. quarter lb. 40 cts., pound \$1.25.**

STANDARD VARIETIES, Packet 5 cents.

Grand Rapids. Early forcing lettuce
Early Curlee Silesia. Fine for cutting
Hanson. Large, sureheader

MELONS

NEW GOLDEN WINNER MUSK MELON

Last year was the first we offered this Melon to our patrons, but it has already made good every claim we made for it, and in our own trials it was the most popular with young and old. It is only medium, but uniform in size, evenly colored, outside green, netted like the Gem; the flesh is thick, of a reddish salmon; free from stringiness; very sweet and deliciously flavored, and a good shipper.

Packet 10 cts., oz. 25 cts., quarter lb. 70 cts., lb. \$2.00.

Standard Varieties MUSK MELONS, packet 5 cents

Extra Early Hackensack. Extra early, green flesh, large
Tip Top. Flesh thick, quality fine

Northern Grown Garden Peas

FINEST STRAINS SELECTED STOCK

New Early Market Pea

This extra early dwarf wrinkled Pea is without a doubt the sweetest and most productive of all the extra early peas. This remarkable variety is only a few days later than the smooth early varieties, and is almost another time as large, and is well filled with plump green peas, while the quality is equal to, or a superior to many of the late sorts. It grows only 15 inches high, needs no brush; it matures very uniformly, the bulk of the crop may be picked on one picking. This may be considered a great advantage in picking time. **Every gardener should plant Early Market, both for market and home use.** Pkt. 10 cts., half pint 20 cts., postpaid; by express, pint 20 cts., quart 30 cts., 4 qt. \$1.10, peck \$2.00, bu. \$8.00.

New America

LARGEST AND MOST PRODUCTIVE EARLY PEA IN CULTIVATION.

It is only about six days later than Early Market. Its long, thick, dark green pods, filled with its immense plump peas, make it a delight to every one, and is a pleasure to gather them for market. **Its fine appearance and sweet delicious quality will make it the leading garden Pea on every market.**

Packet 10 cts., half pint 20 cts., postpaid; by express, pint 20 cts., quart 25 cts., 4 quart \$1.30, peck \$2.50, bu. \$9.00.

The Pea crop has been a failure the world over. **Order early.**

Owing to the shortage of the Pea crop, all varieties will run short. We reserve the right to return orders for Peas alone, but will do our best to fill all orders as long as the supply lasts.

ASBURY PARK, N. J., Jan. 17, 1910.

GLICK'S SEED FARMS,
LANCASTER, PA.

DEAR SIR:—

Please send me your latest catalogue and prices of all your seeds, especially on Grass Seeds and potatoes. I had such good luck with your seeds last year, I want to plant them again. Your Beets were the best of all the Beet family. I planted ten varieties and your New Century Beet was the best of all. I remain, yours truly,

JOHN HLMER.

HEMPSTEAD, L. I., N. Y., Oct. 25, 1909.

GLICK'S SEED FARM,
LANCASTER, PA.

DEAR SIR:—

Your "New Century" Beet is all you claim for it. Very dark red, sweet and tender. Never gets tough, as good in mid-winter as when young.

Cordially yours,

FRANCIS BRILL.

DEAR SIR:—The seed arrived in good shape; and is nice.—JRA B. TUTHILL. SPECOK, N. Y.

We Are Headquarters for California Grown Radish Seed

Early in the spring of 1909, when business conditions looked somewhat gloomy, we placed a contract with one of the principal growers, to grow a large quantity of Radish seed for us. This enables us to offer **High Quality Seed at Astonishing Prices.**

Early Scarlet Button

This is a splendid strain of early round Radish; the skin is bright scarlet, flesh pure white, crisp, tender and mild in flavor; excellent for out door or for forcing under glass. Pkt. 5 cts., oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 50c.

White "Icicle"

The finest and longest of the very early pure white varieties. Planted in spring the radishes are ready for use in twenty to twenty-five days; their long slender form and pure paper-white skin are most attractive when bunched for market. This radish is not only crisp and tender when young but retains these qualities until the roots attain large size, so that it will remain in fine condition longer than any other first-early variety. It is excellently adapted for forcing purposes or successive sowing in the open ground. Pkt. 5 cts., oz. 10c., $\frac{1}{4}$ lb. 25 cts., lb. 60 cts.

White Wonder

This grand white radish has no superior among the main crop sorts.

WHITE WONDER RADISH

The skin and flesh of it is snow white. It is fully a week later than the Icicle and remains in good condition until it attains an immense size; in its quality it stands second to none; it is always **Crisp, Mild and Juicy**; its long, slender form makes it very attractive when bunched for market. Pkt. 10 cts., oz. 15c., $\frac{1}{4}$ lb. 35 cts., lb. 75c., 3 lbs. \$2.00.

Chartier, Shephard.

This old standard still holds a very prominent place among the long crimson varieties; its slender growth, with its fine white tip, gives it a very beautiful appearance when bunched for market. Pkt. 5 cts., oz. 10c., $\frac{1}{4}$ lb. 25 cts., lb. 55c., 2 lbs. \$1.00.

Pkt. of each of our 4 best radishes 20c. Oz. of each of our 4 best radishes 30c.

We can furnish plants of all these varieties. See prices on page 21.

Vegetable Plants "That Grow"

All the Leading Varieties "Sold Direct"

We grow annually hundreds of thousands of Vegetable Plants. We now have nearly two thousand feet under glass, besides we grow acres of cut-door plants. If you have never tried our plants, send us a trial order, we will do the rest.

Large orders are sent by express at the special plant rate, (20 per cent. less than merchandise rate), purchaser to pay the express charges.

We aim to fill all orders promptly, but appreciate it when orders are sent us a few days in advance; bad weather sometimes delays digging out door plants. All plants are carefully dug, (when you buy plants from us, you get the roots too). In packing plants for shipment, we use ventilated packages, and pack the roots in high grade Jersey Moss. We prefer to make shipment on the evening trains; especially in hot weather. In this way, plants often reach their destination by the following morning; thus insuring safe delivery to almost any point.

Our Plants are grown from the very best strains of seed, and should not be compared with plants grown from cheap seeds. We can furnish plants of all the varieties of which we offer seed, and aim to have them pure and true to name, but we give no warranty, nor will we in any way be responsible for the crop.

PLANTS POSTPAID BY MAIL

With our new plant mailing tubes we can deliver plants quickly, and in good condition to almost any post office in the United States.

We accept postage stamps (2-cent) for cash on accounts less than \$1.00. We receive considerable paper money in ordinary letters; this is always at the risk of the remitter, but we have never yet had any of our patrons to loose anything by it, but we prefer Post Office Money Orders or Registered Letters when convenient for our patrons.

Our Plants are the right kind. **Send us your orders; we will send you Good Plants.**

GEO. W. CAULFIELD.

TOMATO PLANTS READY TO PLANT IN COLD FRAMES

The past few years we have made a specialty of furnishing market gardeners with Tomato Plants, ready to plant in cold frames after severe weather is over, (April 1st to May 1st). Most truckers find it an advantage to have their own early plants. By planting these 4-inch plants, either in pots or well enriched loose soil, direct in the hot beds or cold frames, and keeping them well watered, they will make large, extra strong plants by the time it is safe to plant out doors. Plants should be set about 6 inches apart each way in the bed, and should be planted as deep as possible. When ready to plant to the field, soak the soil thoroughly with water the night previous; this will make it adhere to the roots. By using a good spade and digging each plant carefully, they can be moved without checking the growth; this is very important for the **early crop**. We consider the Early Fourth of July and Spark's Earliana the most profitable, but can furnish all the leading varieties. **100 4-inch plants, prepaid, 40 cts., 1000, prepaid, \$3.50.**

DEMING SPRAYERS

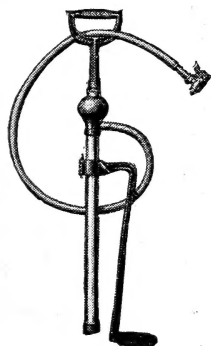

For All Spraying Conditions

Two dozen styles of Spray Pumps from Small Bucket and Knapsack Sprayers to the Barrel, Tank and Power Sprayers for Extensive Orchard Operations. Seven styles of Spraying Nozzles and a score of Spraying Appliances.

DEMING SPRAYERS ARE PRACTICAL

Pumps have Brass Working Parts. We make the patent Bordeaux, Demorel and Simplex Nozzles. Used and recommended by leading fruit growers and Agricultural Experiment Stations. They are known as "The World's Best."

A few DEMING SPRAYERS are illustrated below.

"Success"
Sprayer
Fig 659

THE "SUCCESS" SPRAYER

THE "Success" is a very effective pump for general use in the garden, greenhouse and small orchard. The brass air chamber insures a steady stream and enables the operator to pump very slowly, at the same time securing a very forcible spray.

With the exception of the malleable iron foot rest, 15 inches high, and the handle, the pump is made entirely of first quality brass upon which spraying liquids have no perceptible effect.

The "Success" is regularly fitted with our Bordeaux Nozzle and three feet of $\frac{3}{8}$ -inch hose. It is put up in a strawboard box, and when crated ready for shipment, will weigh about 10 pounds.

LIST PRICE

Fig 659. "Success" pump, as illustrated and described, (Cipher, *Koran*)-----\$6.00

THE "PERFECT SUCCESS" SPRAYER

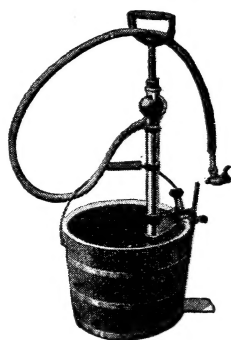

THE "Perfect Success" is excellent for white-washing and disinfecting stables and poultry houses; also for washing windows and buggies, for putting out fires, and for various other uses in addition to the regular work of spraying.

In general construction it is the same as the "Success," except that it has a special adjustable foot rest which clamps bucket and pump firmly together, holding the bail upright against the pump, so that the entire outfit may be carried in one hand.

Four feet of $\frac{3}{8}$ -inch hose and our Bordeaux nozzle are furnished. Packed in neat strawboard boxes. Shipping weight, crated, about 13 pounds.

LIST PRICE

For description see page 24.

"Spraying Made Easy" by the Use of "Deming Sprayers"
"THE WORLD'S BEST"

"GARDENERS' CHOICE" SPRAYER

A "One Man Machine"---Always Useful

The frame of this outfit is largely wrought iron pipe, and the twenty-four gallon tank is hard wood, well hooped. The wrought iron wheels are 24 inches in diameter, with a tire width of $1\frac{1}{4}$ -inch. The extreme distance from hub to hub is 33 inches, and 30 inches from the ground to top of tank. No axles are used, the wheels being attached to the tank by trunions.

The pump itself has $1\frac{1}{2}$ -inch brass cylinder and 4-inch stroke and is furnished with 4 feet of hose and Bordeaux nozzle. Shipping weight of Fig. 651 complete, crated, is about 115 pounds.

LIST PRICE

Fig 651. "Gardeners' Choice" outfit complete, as illustrated, (Cipher, Kidder) \$15.00

"Gardeners' Choice" Sprayer

Fig. 651

THE "CENTURY" BARREL SPRAYER

THE "Century" is the best all-around barrel sprayer on the market. The pump is only 44 inches high, having the large air chamber principally within the barrel, so no projecting parts can catch in the branches of trees, etc. The cylinder is submerged in the liquid and is constantly primed.

Made in one size only, with $2\frac{1}{4}$ -inch cylinder. Pump has $4\frac{1}{2}$ -inch stroke; all working parts are brass.

Shipping weight, pump only, boxed, about 75 pounds.

LIST PRICE

Fig. 645. Sprayer only, without discharge hose but with Y connection.

No. 2. - - - (Cipher, Kinate) 13.00

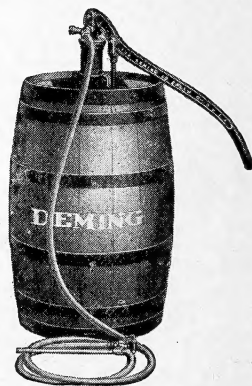

Outfit "A," as above with addition of one $12\frac{1}{2}$ -foot section of $\frac{1}{2}$ -inch hose, Demorel nozzle and pole holder.

No. 2. - - (Cipher, Kernish) 18.00

Outfit "B," as above, but with two $12\frac{1}{2}$ -foot sections of $\frac{1}{2}$ -inch hose, Demorel nozzle and pole holders.

No. 2. (Cipher Knightly) \$22.50

These prices are LIST and subject to a liberal discount.
